If you want to add this license key to the software, then you must be **online** and may use either the automated or manual method detailed below:.

Automated method:

Open the attached .xcvault file, which contains your license key. Your product installer includes a utility that enables your system to use the .xcvault file to register your license key, which will take place automatically once you open the file. Please close and restart any open instances of the software once this process is complete.

Manual method (*requires any new version to be downloaded and installed already*)

PDF-XChange Editor:

Download and install the new version of the software that you want to register. Copy the serial key detailed above, then open PDF-XChange Editor, click the 'Help' tab and then click the 'Enter License Key' button in the user interface. The preferences dialog box will open. Click 'Add New License Key', then paste the license key into the window and click 'Continue' to register the key.

PDF-Tools:

Download and install the new version of the software that you want to register. Copy the serial key detailed above, then open PDF-Tools, click the 'Help' tab and then click 'Enter License Key' in the dropdown menu. The preferences dialog box will open. Click 'Add New License Key', then paste the license key into the window and click 'Continue' to register the key.

PDF-XChange Standard/Lite Printer:

Download and install the new version of the software that you want to register. Copy the serial key detailed above, then open the PDF-XChange Standard/Lite Printing Preferences dialog box. (To open this dialog box, search for 'printers' in the Windows Search feature on your machine. PDF-XChange Standard/Lite will be detailed in the list of installed printers. Click the desired printer, then click 'Manage'. The list of 'Manage your device' options will be displayed. Click 'Printing Preferences' to open the PDF-XChange Standard/Lite Printing Preferences dialog box). Click the 'About' tab, then click the 'Registration' button. The 'License Keys' dialog box will open. Click 'Add new Serial Key', then paste the license key into the window and click 'Continue' to register the key.

PDF-XChange PRO:

Use any of the methods detailed above to license one of the products included in the PDF-XChange PRO bundle. The other products will then be licensed automatically.
